ALPHA TRAINER

The Smart Training Choice

The Alpha Trainer combines performance and efficiency making it the perfect flight training aircraft. Through modern aerodynamic design and high-tech manufacturing, the Alpha Trainer provides superb performance and flight characteristics with low operating costs thanks to its fuel-efficiencies.

The Alpha Trainer comes equipped with all the essential features expected for flight training, including a strong, durable undercarriage and gentle flight characteristics. Suitable for both entry-level flight training and experienced aviators, the Alpha Trainer offers a quiet, relaxing cabin with easy access and is a comfortable learning environment for students.

Operated throughout the world in some of the harshest conditions, the Alpha Trainer is a trusted and proven trainer, backed by Pipistrel's service and support network.

Innovation and Sustainability

Innovation and sustainability are core to Pipistrel's DNA. The Alpha Trainer was designed with this in mind, providing fuel-efficient, aerodynamic performance while minimizing its environmental impact.

SAFETY AS STANDARD

- LSA certified and fully approved for Day/Night VFR operations with benign stall characteristics.
- Equipped with a ballistic parachute rescue system offering peace of mind.
- Proven track record training thousands of pilots across the world with a strong, robust design.

VALUE

- Low cost to purchase and operate, the Alpha Trainer is the perfect compromise between performance and price.
- Simple design with low maintenance costs, backed by Pipistrel's global distribution network for sales and service.
- Built to provide value for flight schools making flight training more accessible to all.
